

ANKESH KUMAR

Full-Stack Developer | Machine Learning & AI Engineer | Python Developer

Bhagalpur, India | 9801839488 | kumrankesh921@gmail.com | [linkedin.com/in/ankesh-kumar921](https://www.linkedin.com/in/ankesh-kumar921) | github.com/Ankeshkrats

SUMMARY

B.Tech CSE (Artificial Intelligence) undergraduate with **dual expertise in full-stack web development and applied Machine Learning/AI**. Built and deployed **4+ production-ready systems** spanning React/Next.js SaaS applications and LLM-powered ML/NLP pipelines. Comfortable owning a project end-to-end — frontend to model deployment. Graduating 2026, **CGPA 8.2/10**. Open to Full-Stack Developer or Machine Learning roles.

SKILLS

Web Development: React.js, Next.js, Node.js, Express.js, Flask, REST API Design, HTML5, CSS3, Tailwind

Machine Learning / AI: Regression, Classification, NLP, LLM Integration (Groq/Llama-3), RAG, Feature Engineering, Scikit-learn

Programming: Python, JavaScript, C++, C

Data & Databases: Pandas, NumPy, MongoDB, MySQL, Data Cleaning & Visualization

Cloud & Deployment: Vercel, Render, Git, GitHub, Postman, Jupyter Notebook

PROJECTS

AiEvl — AI-Powered Assignment Evaluator (SaaS)

Tech: Next.js, Node.js, MongoDB Atlas, Groq SDK (Llama-3), OCR, Tailwind CSS

- Built a full-stack SaaS platform (**Next.js, Node.js/Express REST APIs**) with OCR + **Llama-3 LLM** integration for automated semantic grading, **cutting manual grading time by ~70%**.
- Architected real-time cloud-sync with MongoDB Atlas + REST APIs for professor/student portals — live at [AiEvl](#).

Loan Approval Prediction Platform

Tech: Python, Flask, Scikit-learn (Logistic Regression), Pandas, NumPy, Render

- Built an end-to-end ML web app (**Flask backend + responsive HTML/CSS/JS frontend**) predicting loan approval with **real-time confidence scoring (predict_proba)**.
- Deployed live with Git-based CI — [loan-predict-479a.onrender.com](#).

Spam Detection System (ML/NLP)

Tech: Python, Scikit-learn, NLTK, TF-IDF

- Built a supervised NLP pipeline (tokenization, TF-IDF) achieving **~90% classification accuracy** across multiple models.

Weather Forecast & Observation Chatbot

Tech: HTML, CSS, JavaScript, Python, OpenWeather API

- Designed a hierarchical, menu-driven weather chatbot covering **all 38 districts and blocks of Bihar**, routing granular, localized forecast data via the **OpenWeather API** through a conversational interface.

EXPERIENCE

Machine Learning & Data Science Intern — iHub DivyaSampark, IIT Roorkee Jan 2024 – Feb 2024

- Developed and evaluated **ML model development, data preprocessing, and deployment workflows** across real-world datasets.

Full Stack Development Intern — Invigo Infotech Jun 2025 – Jul 2025

- Engineered and implemented responsive full-stack features using **React, JavaScript, Python, and MySQL**.

Machine Learning Intern — Internshala Dec 2023 – Feb 2024

- Built Python-based applications involving **MySQL integration, GUI design, and automation scripts**.

Salesforce Developer Intern — Virtual Internship Jan 2024 – Feb 2024

- Applied Salesforce CRM fundamentals, workflow automation, and application customization.

Telecommunication Intern — East Central Railway, Muzaffarpur Dec 2025 – Jan 2026

- Completed hands-on training on railway telecommunication systems, including **IP-based communication and LAN/WAN networks**.

EDUCATION

B.Tech – CSE (Artificial Intelligence), Purnea College of Engineering, Purnea 2023 – 2026

CGPA: 8.2 / 10.00

CERTIFICATIONS

Introduction to Machine Learning — NPTEL/IIT Kharagpur | Python Essentials 1 & 2 — Cisco Networking Academy | Soft Skills — NPTEL/IIT Roorkee
